MINIMUM CORE JOB DESCRIPTION FOR A BAND 7 MACMILLAN CLINICAL NURSE SPECIALIST (CNS)

Introduction and Purpose

There are approximately 3500 Macmillan CNS’s working across the UK and this number is set to increase radically over the next 10 years. Currently, many are working to different job descriptions, have different titles and until now there has been little agreement of what the role should cover.

Working in partnership with Skills for Health, Macmillan has developed a Nationally Transferable Role (NTR) for Macmillan CNS’s which outlines the competence required to fulfil the role. The NTR is an important step towards establishing consistency within the role across the UK and setting a benchmark standard, which will benefit patients, commissioners, employers and employees.

To complement the NTR, Macmillan has developed a core job description (JD) and person specification to describe the skills, knowledge and behaviours required, which are transferable across the UK and across the statutory, voluntary and private sectors. The JD outlines the minimum that will be required by all new Macmillan CNS posts, whether treatment-specific, site-specific or working within palliative and end of life care.

The purpose is to set the minimum standard for all new Macmillan CNS posts from 1ST April 2011 onwards. Over time there may be an opportunity to influence older JD’s when vacancies arise or through service improvement or service re-design. Additional content can be added to this core job description according to local requirements for example independent nurse-prescribing or physical examination skills. So this is a minimum core rather than an exhaustive list of all the tasks and roles a Macmillan CNS might undertake.

Scotland will continue to use the NES Capability Framework which was developed in partnership with Macmillan in 2007 rather than the NTR as it is already accepted and widely used across the nation and similarly is based on the NHS Nursing Career Framework. However, there is an expectation that the content of the Macmillan core JD will be used as outlined above.

The content of the attached JD must be reflected in all new CNS JD’s, although the format and language is likely to differ according to the partner organisation’s (PO) preferences. Each MDM has the responsibility to agree the JD with the PO for every new post approved and must ensure that the contents are in line with this JD. There is an expectation that the regional SMDM’s and General Managers will also take responsibility to check that JD’s are reflecting our position before approving funding.
