

# National Cancer Awareness Day

Have you had your cancer care review?

We will offer a cancer care review following a cancer diagnosis.

You will be contacted within the first three months with an opportunity to discuss your diagnosis and to explore any support you may need.

You will be offered a further appointment within twelve months of your diagnosis to talk about your cancer experience, understand the support available to you locally and how to begin supported self-care.

If you or someone you know has not had a cancer care review, please let the patient services team know and they will book an appointment at a time to suit you and can be in person, over the telephone or digitally.
