Getting your test results

About this easy read booklet

This booklet is about getting your test results.

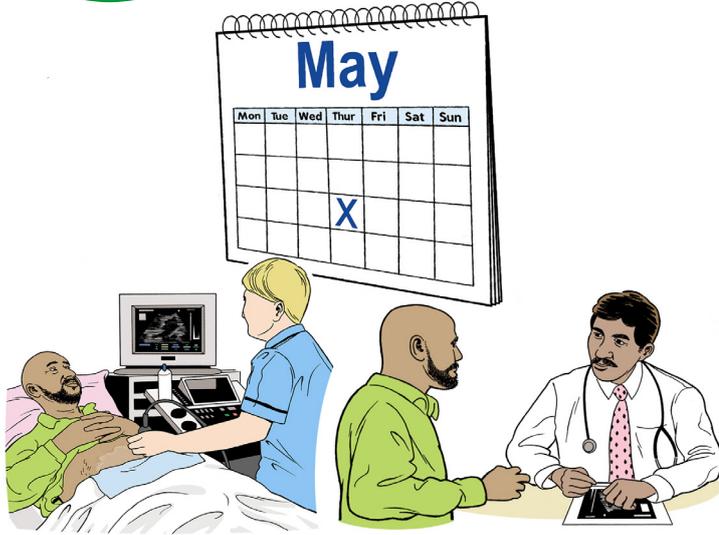

You can learn about the different ways you may get your results.

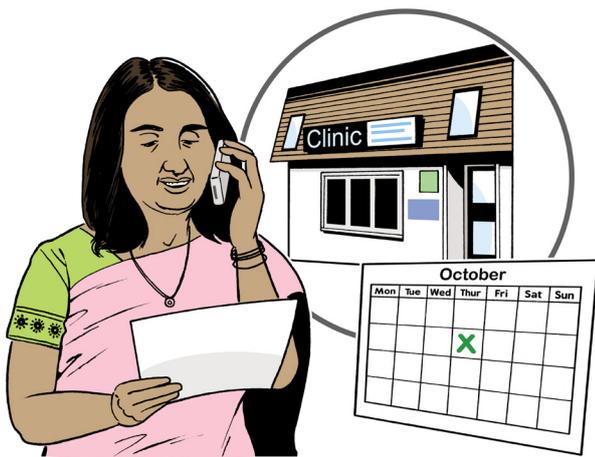

If you are worried about your health, you should talk to a doctor or nurse.

Getting your test results

Sometimes when you have a test, you will get the results on the same day.

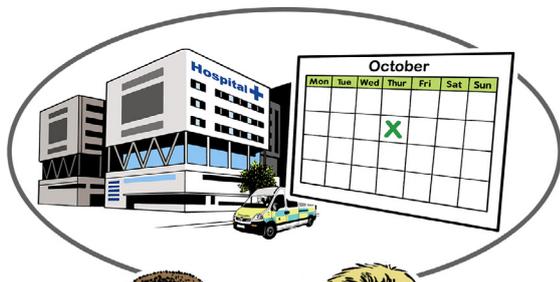

With other tests you may have to wait for your results from your doctor.

Waiting for test results can be worrying.

If you feel worried it is important to talk to someone about how you feel.

You may be asked to come back to see the doctor for your test results.

The doctor will explain your test results to you. It is a good idea to have someone with you. This could be a family member, a friend or someone else who supports you.

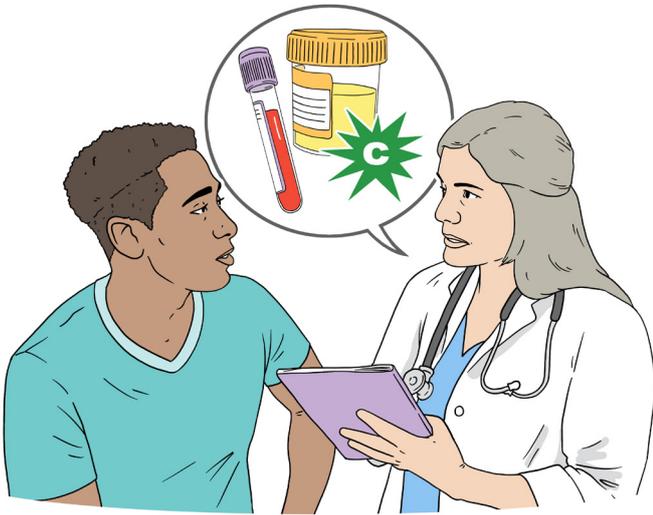

The doctor may tell you that you do not have cancer.

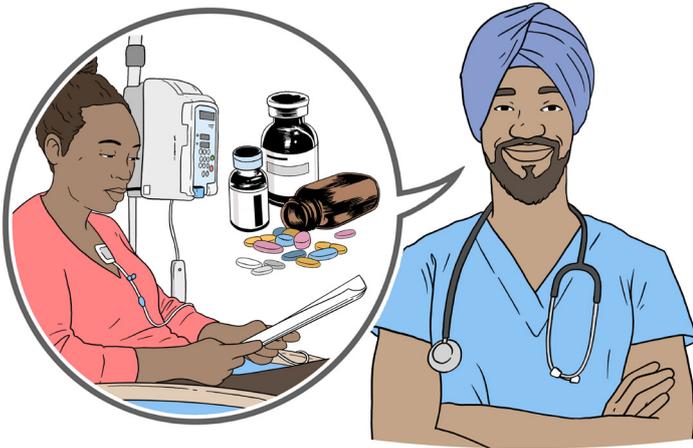

This is very good news but you may still feel worried.

If you are still worried after getting your results you should talk to someone about how you feel.

If you do have cancer, your doctor will tell you what happens next. You may need more tests to find out more about the cancer.

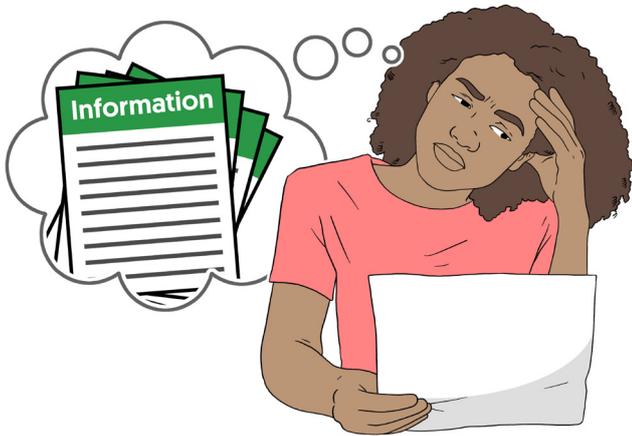

Your doctor will explain what treatments might help.

They will give you information to help you make decisions about the treatment you want to have.

It can be scary to find out you have cancer. You may be worried about what will happen.

It can also be a lot of information to think about.

Your doctor, nurse, or other people who support you can help you understand. They can answer your questions and help with any worries you have.
