

Holistic Needs Assessment

We know that a cancer diagnosis can affect many areas of your life, not just your physical health.

Completing a **Holistic Needs Assessment** can help you to identify what support is available, and is a way for us to personalise your care.

How it works

- You will be invited to complete a checklist about any concerns that you have at the moment.
- You fill it in to discuss your concerns with your care team.
- We will then create a support plan together – personal to you.

Next Steps

Please ask your care team if it's something that you might like to do now.
