Symptoms of prostate cancer

Symptoms, Screening and Staying Healthy
This booklet uses easy words and pictures to help you get information about cancer.

You might want someone to help you look at the booklet so you can talk about it.

There is a Word Bank at the back of the booklet to help with hard words. Any words in bold you can find in the Word Bank.

This booklet can help you learn about cancer. But this is not the same as talking to your doctor. If you are worried about your health, you should talk to a doctor or nurse.
Prostate cancer is the most common cancer in men.

It is more likely to affect men over 50.

Men who are African or African Caribbean are more likely to get prostate cancer than white or Asian men.
The prostate is a small gland inside your body. It is near your bladder. The prostate makes semen - the liquid that comes out of your penis when you have sex or masturbate.

As men get older the prostate gets bigger and can cause symptoms.

Symptoms can include:
- Needing to wee more often, mainly at night
Symptoms of prostate cancer

- Finding it hard to start or stop weeing
- Pain when having a wee
- Pain when you come during sex (ejaculate)
Less common symptoms are:

- Blood in your wee

- Pain in your back, hips, or pelvis

These symptoms can be caused by other things. But it is best to get checked by your doctor.
Symptoms of prostate cancer

The doctor will ask you about your symptoms and take a sample of your blood.

He may also check if your prostate is bigger than normal. To do this he will feel inside your bottom.

You may have to have more tests. This will depend on your results.

Prostate
The prostate is a small gland inside your body. It is near your bladder. The prostate makes semen - the liquid that comes out of your penis when you have sex or masturbate.

Pelvis
This is the large bone at the bottom of your back which connects your spine to your legs.

Bladder
The bladder is a round organ inside your body in the lower tummy area. It stores your wee (urine).
**Screening**
These are special tests that can sometimes find cancer early.

**Symptoms**
Signs in your body that tell you something is wrong, like feeling tired all the time.
