Use this red strip as the string for hanging your tree

## Step 1: Let's get started

Cut out the tree shape and the red strip.

## Step 2: Begin folding

Turn the tree shape over so that the white side faces up. As shown on the diagram, fold side A so that it meets the solid red line. Repeat for side B.

## Step 3: Continue to fold

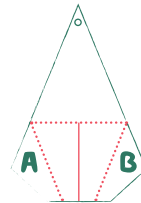

Fold the shape in half along the dotted red line.

## Step 4: Nearly there!

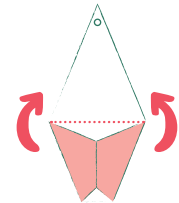

Use the dotted white line on the red section as a guide, fold the shape downwards to form the trunk of the tree.

## Step 5: Treerific ... You're ready!

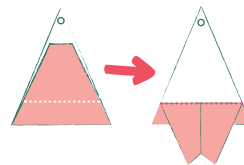

Turn your tree over and thread the red strip through the hole. Your bauble is now ready to be placed onto the tree.
